SCP-5

SCP-5 is a hard nose penetrator that is housed within Mk-82 Form Factor. It is highly effective against hardened bunkers, bridge piers and A/C pens. The penetration is maximized through kinetic energy gained by bomb as it follows its ballistics. The bomb has a dynamically stable explosive specifically required for penetrators.

SALIENT FEATURES

- Penetrates four double-reinforced concrete walls/floors 200mm thick each
- Penetrates 1.5m in 35MPa reinforced concrete target.
- Can be used as an effective stand off weapon in combination with a Range Extension Kit.
- Compatible with all guidance systems.
- Qualified to MIL STD 810H.

OPERATIONAL SPECS

SPECIFICATIONS

Penetration in 5000psi reinforced concrete target	1~1.5 meter
Max Fragment Lethal Range	> 250 m
Explosive dynamic shock capacity	Mach 3 Impact
Max Blast Over Pressure (open environment)	17.5 g/cm³
