AZB PGM SERIES

AZB series of precision guided munition (PGM) kits are indigenously developed Range extension kits for use with general purpose Mk series bombs. The weapon is primarily all weather fire and forget system with GNSS guidance as primary source of navigation. The kit can be integrated with aerial platforms including variety of aircrafts and UAVs based on their weight class category.

SALIENT FEATURES

- All weather fire and forget weapon
- GNSS guidance as primary source of navigation
- Anti GNSS jamming capability
- Critical maneuvers to meet operational requirements
- Standard interface with Mk / Pk Series Warhead (Blast Frag / Pre-Frag / Penetrator WH)
- Mil Std 810F / 461D compliant
- ITAR free
- Ultra precision option with Imaging Infrared Seeker available

AZB WEAPON SERIES

Model No	Weight Class (kg)	Warhead (kg)	Platform	Range (km)	CEP (m)
AZB - I	80-90	40-50	UAV	35-50	≤10
AZB - II	150-175	80-100	UAV / Aircraft	50-75	≤10
AZB - III	300-350	175-225	UAV / Aircraft	50-100	≤10 , ≤ 03*
AZB - IV	600-625	390-425	Aircraft	75-100	≤10 , ≤ 03*
AZB - V	750-800	390-425	Aircraft	190-220	≤10 , ≤ 03*
AZB - VI	1100 - 1200	850 - 925	Aircraft	90-100	≤10 , ≤ 03*

* Optional Imaging Seeker
